

CHRYSO®Premia

Superplasticisers

High water reducers for precast concrete

- ✓ Significant increase in concrete fluidity and stability for greater consistency during production
- ✓ High early-age strengths for reducing the energy required to produce concrete elements
- ✓ Superior quality of finished concrete products

CHRYSO®Premia 310

- High early strength
- Extended workability
- Ideal for producing reinforced concrete elements

PRODUCT HIGHLIGHTS

Versatility in terms of raw materials and applications

CHRYSO®Premia 525

- High early strength
- Fill-Free® Technology : Low thixotropy concrete
- High surface finish quality

PRODUCT HIGHLIGHTS

Extended workability retention

CHRYSO®Premia 570

- Extreme early strength
- Good product performance at low dosage
- Fill-Free® Technology : Low thixotropy concrete

PRODUCT HIGHLIGHTS

Extreme early strength performance

Packaging

215-litre drum

1,000-litre IBC

Areas of application

- HPC - VHPC - UHPC
- Prestressed concrete
- Self-compacting concrete
- Wetcast
- Reinforced concrete
- All types of cement

Concrete classes and types

- All types of precast elements
